

Napkin 1:

- Any thought as to how we would do the bins for the hist?
- Look into bin size formulas.
 - Used Freedman-Diaconis rule

Napkin 2:

- Look up best practices for heat maps.
- Concerned that it might come out looking like a population map.

Napkin 3:

- Looks good.

Napkin 4:

- Adjust titles on axis to be more specific (Number of Employees)
- Filter this out into more detail? Per state or per industry?
 - Tyler wants more of a broad visualization.

Napkin 5:

- Lots of explanation needed for this one.
- Is question Code ordered in any way? Maybe put in numerical order? Make this axis easier to understand.

Dashboard Feedback:

- Like the idea of selecting options in a slider
- Slider issue
- Parameter option in Tableau
